YaraMila™ 8-11-20

Balanced Nutrition for Fruit and Vegetable Crops with High K Demand.

YaraMila 8-11-20			
Total Nitrogen (N)	8%	Sulphur (S)	2.6%
Nitrate Nitrogen (NO ₃)	1%	Boron (B)	0.01%
Ammonium Nitrogen (NH ₄)	7%	Colour	Blue
Phosphorus (P)	10.5%	Bulk density	1.1kg/l
Potassium (K)	20%		

Completeness

YaraMila products contain balanced and efficient nutrition in every granule. In addition to nitrogen, phosphorus and potassium, YaraMila 8-11-20 also contains, sulphur and Boron.

Balanced Source of Nitrogen

YaraMila products contain both nitrate-N and ammonium-N which supports fast crop growth and ensures good root development. Ammonium nitrate is an ideal nitrogen source for surface application to reduce potential volatilisation losses.

Available Phosphorus

All phosphorus is fully plant available, as water soluble orthophosphates and ammonium citrate soluble phosphate. The combination of different forms gives a greater and longer lasting availability of phosphorus to crops over a wide range of soil types.

Potassium for Balance

YaraMila 8-11-20 contains a mix of potassium chloride (MOP) and potassium Sulphate (SOP). Potassium is important for all crops as it stimulates growth of strong stems and provides some disease, pest and stress tolerance by increasing the thickness of the outer cell walls. It is also vital to the regulation of water movement through the plant.

Superior Handling

The YaraMila 8-11-20 granule is specifically designed to allow easy and accurate spreading by machine or hand.

Benefits:

- Balanced nutrition in every granule supports better nutrient uptake and plant growth.
- Uniform granular fertiliser that has low dust, excellent handling and spreading characteristics for consistent application.
- Rapid nutrient release to satisfy requirements of quick growing, high yielding crops.
- Potassium in both sulphate and chloride form
