YaraVita™ EZY THIN

Blossom thinner for use with apple and stonefruit crops

Active Ingredient

ammonium thiosulphate (ATS)
as a soluble concentrate

782 g/L

Why Foliar Apply?

Foliar sprays ensure precise application of the right nutrient mix at the right time, and can be specifically targeted to the leaf or fruit, to suit an immediate crop need.

Foliar application also provides nutrients for immediate uptake by the leaves or fruits. As a result, the grower is not reliant on the right soil, pH or growing media conditions and can quickly put the crop back on course.

Ammonium Thiosulphate is commonly applied as a blossom thinner to pommefruit and stonefruit, normally when 80% of flowers are open. Further applications can be made to remove other unwanted flowers. Seek local agronomic advice.

Benefits:

- Formulated for safe application at critical growth stages to satisfy crop requirements
- Widely tank mixable with other crop sprays.
Visit www.tankmix.com for details
- Proven, reliable performance
Trialled
- and tested on a wide range of crops around the world
- High quality, consistent products.
- Manufactured to ISO 9001 quality assurance standards

Application rates and timings

Apple, Apricot, Cherry, Nectarines, Peach, Pears, Plum:

Use 1.5 litres of Ezy-Thin per 100 litres of water applied at a minimum spray volume of 500 litres per hectare.

Apply a sufficient water volume up to the point of run off and matched to the crop/tree being sprayed. For concentrate spraying, adjust the rate accordingly. Seek local agronomic advice.

Timing: The first application should be made when sufficient bloom has set on target wood (normally when 80% of flowers are open). Further applications are made to remove all other unwanted flowers (typically 1 to 4 applications for apples, 1 to 3 applications for apricots, cherries, nectarines, peaches, pears and plums).

DIRECTIONS FOR USE

ALWAYS FOLLOW THESE LABEL INSTRUCTIONS

Mix the product thoroughly before use. Slowly add the product to the tank, via the induction hopper, whilst agitating. Top up with water and continue to agitate until spraying is completed.

TANK MIXING/CO-APPLICATION

Read ALL labels carefully and adhere strictly to the instructions for use. Co-application is entirely at the risk of the end-user. Before co-application of products you, or your advisor, must visit www.tankmix.com for important information. Alternatively, contact Yara for specific advice

PRECAUTIONS

Only to be used on protected crops if specifically listed. Avoid application under extremes of climate, e.g. rapid drying conditions, extremely slow drying conditions, frost, rain, or when frost or rain are anticipated. Wear suitable gloves and face shield when handling this product. Clean all equipment before and after use.

STORAGE

Keep in a cool, dry chemical store, out of reach of children and livestock. Protect from frost and other climatic extremes (temperatures exceeding 40°C). Dispose of contents and container in accordance with all local, regional, national and international regulations

CONDITIONS OF SALE

This Product is sold subject to the seller's Terms and Conditions of Sale, which are available upon request. Use of the Product is acceptance by the buyer of the Terms and Conditions of Sale.
