YaraTera™ KRISTA™ MgS

YaraTera KRISTA MgS is a fully water soluble sulphur and magnesium fertiliser. It is a free flowing, fine crystalline powder which dissolves quickly in water without any residues. Suited to application through all fertigation systems - hydroponics, drip systems, low throw sprinklers, centre pivots and spray units.

Product Specification			
Magnesium (Mg)	9.6%	Solubility (20°C)	750 g/l water
Sulphate (S)	13%	EC (1 g/l at 25° C)	0.7 mS/cm
		pH (1% solution)	6.6

Importance of Magnesium

Cation balance

High potassium levels in the plant or soil will reduce the efficiency of magnesium, reducing crop yields and quality. Other cations such as ammonium, calcium, hydrogen (low pH) and aluminium can also reduce the availability of magnesium.

Photosynthesis

Magnesium is a major component of chlorophyll, which is essential for photosynthesis.

Importance of Sulphur

Is an important nutrient for plant growth, playing a key role in amino acid synthesis

Benefits

High purity fertiliser

YaraTera KRISTA MgS contains no elements detrimental to plants. It is free of chlorine compounds, sodium and heavy metals.

Fully soluble

YaraTera KRISTA MgS is a free-flowing, fine crystalline powder which dissolves quickly in water without any residues.

Compatibility

YaraTera KRISTA MgS can be mixed with all water-soluble fertilisers, except soluble calcium fertilisers.
