

# YaraVita™

## Ezy-Mg™ Plus

**Foliar and fertigation Magnesium with seaweed extract for agricultural and horticultural use**

**Guaranteed analysis: total and water soluble**

Magnesium (Mg)	8 % w/v	80 g/l
Nitrogen (N)	9.3 % w/v	93 g/l

Contains extract of *ascophyllum nodosum* seaweed providing a source of amino acids, plant hormones (cytokinins, auxins, gibberellins and betaines), carbohydrates (alginic acid, mannitol and laminarin).

### Why Foliar Apply?

Foliar sprays ensure precise application of the right nutrient mix at the right time, and can be specifically targeted to the leaf or fruit, to suit an immediate crop need.

Foliar application also provides nutrients for immediate uptake by the leaves or fruits. As a result, the grower is not reliant on the right soil, pH or growing media conditions and can quickly put the crop back on course.

### Magnesium requirements:

Magnesium is the central component of the chlorophyll molecule and is therefore key to all plant growth and development. But, Mg also plays a key role in phosphate and nitrogen metabolism, water uptake by the plant and crop establishment (where applicable).

### Nitrogen requirements:

Protein N is by far the largest fraction of N in the green plant; nitrogen plays a key role in nucleic acid formation, amino acid and protein synthesis. N also has a key role in chlorophyll and ATP synthesis.

The information provided is accurate to the best of Yara's knowledge and belief. Any recommendations are meant as a guide and must be adapted to suit local conditions.

### Benefits

- Formulated for safe application at critical growth stages to satisfy crop requirements
- Widely tank mixable with other crop sprays. Visit [www.tankmix.com](http://www.tankmix.com) for details
- Proven, reliable performance. Trialled and tested on a wide range of crops around the world
- High quality, consistent products. Manufactured to ISO 9001 quality assurance standards
