# YaraVita™ MAGPHOS K

A concentrated phosphorus and magnesium product formulated for foliar application

Guaranteed Analysis: Total

phosphorous (P)	19.2%	192 g/L
potassium (K)	6.1%	61 g/L
magnesium (Mg)	6%	60 g/L

## Why Foliar Apply?

Foliar application provides nutrients for immediate uptake by the leaves or fruits. As a result, the grower is not reliant on the right soil, pH or growing media conditions and can quickly put the crop back on course.

In addition, foliar sprays ensure precise application of the right nutrient mix at the right time, and can be specifically targeted to the leaf or fruit, to suit an immediate crop need.

## Phosphorus requirements:

Phosphorus availability in the soil is affected by pH, soil temperature, nutrient interactions etc. P is involved with ATP, the molecule used to provide the energy to drive many of the chemical processes in the plant. This is why P is particularly important at times of high metabolic activity.

## Potassium requirements:

Plays a key role in the transport of materials within the plant particularly to storage tissues like fruit, seeds and tubers. K also has a role in cell membrane structure, carbohydrate metabolism and energy accumulation and utilisation.

## Magnesium requirements:

Magnesium is the central component of the chlorophyll molecule and is therefore key to all plant growth and development. But, Mg also plays a key role in phosphate and nitrogen metabolism, water uptake by the plant and crop establishment (where applicable).

**Yara Fertilizers (NZ) Ltd**, Box 8746, Havelock North  
New Zealand

## Benefits:

- Formulated for safe application at critical growth stages to satisfy crop requirements
- Widely tank mixable with other crop sprays.
- Visit [www.tankmix.com](http://www.tankmix.com) for details.
- Proven, reliable performance. Trialled and tested on a wide range of crops around the world
- High quality, consistent product. Manufactured to ISO 9001 quality assurance standards
- Easy to use liquid formulation. Pours and disperses easily and quickly into the spray tank
- High nutrient content means lower application rates reducing handling time and waste packaging
